

# BIOSENSORS & FRIENDS

## A NETWORKING SYMPOSIUM

Biosensors

Join us for an exclusive cocktail hour where we unveil the latest powerhouse in the biosensor market: Bruker Biosensors!

**WHEN:** Thursday, January 30, 2025, 5 pm

**WHERE:** The Cafe, Foundry & Lux  
151 Oyster Point Blvd.  
South San Francisco, CA 94080

Bruker Biosensors offers tools for **high-throughput kinetic screening, in-depth kinetic characterization, all the way to kinetic measurements directly on cells.** In this symposium, we teamed up with our colleagues from **Bruker Cellular Analysis**, who complement this portfolio with their **optofluidic platform for antibody discovery.**

**Places are limited. Registration is free but mandatory.**

## AGENDA

### Welcome

Ralf Strasser & Meike Hamester, Managing Directors of Bruker Biosensors

5.00 pm

### AI and SPR for mAB-like Molecules

Jennifer A. Codding-Bui, Senior Scientist Protein Engineering, ATUM

5.10 pm

### Meet the new Triceratops SPR #64

Cyrill Brunner, Application Specialist, Bruker Biosensors

5.35 pm

### From c-end degron to PROTACs

Domnita Valeria Rusnac, Postdoctoral Fellow, University of Washington

5.50 pm

### Advancing Therapeutic Antibody Discovery with Beacon Platform: High-Throughput Single B Cell Screening for Challenging Targets

Vincent Pai, Director of Product Management, Bruker Cellular Analysis

6.15 pm

### Interaction cytometry for the analysis of antibody binding kinetics on single cells

Ulrich Rant, Director Kurt-Schwabe-Institute for Bioanalytical Systems, Meinsberg, Germany, Professor for Physical Chemistry (Sensors), Technical University Dresden, Germany

6.45 pm

### Closing Remarks and Networking

Enjoy some drinks and food while continuing the discussions in a relaxed atmosphere

7.05 pm
