

System Administrator

Munich, Germany

We are a growing provider of scientific instruments for the analysis of molecular interactions and are seeking a highly motivated individual to join our team as production and service engineer for our innovative **helix**[®] biosensors. We welcome applications from high-potentials in the **early stages of their careers** who are keen to work with complex scientific instruments.

If you don't think that

- cloud based services has something to do with in-flight service
- a router is mainly used for wood working
- Linux must be a character from Asterix & Obelix
- DevOps is a special unit in a Hollywood movie

then you might be exactly the person we are looking for!

If you even think we must have based the following profile on your CV

- a friendly, enthusiastic personality with great team spirit and a positive, hands-on attitude combined with a goal-oriented will to get things to work
- a self-reliant and organized working style
- openness towards new technologies
- a qualification in computer and network administration
- experience in the administration of heterogenous networks of network appliances, Windows 10 Clients, Windows and Linux Servers, both cloud and on-site, as well as cloud-based services like Office 365
- proficiency in one or more scripting language for task automatization

then you should **definitely apply!**

Your tasks:

- Maintenance of Windows server Active Directory and Group Policies
- Configuration and administration of Office 365 and other cloud-based services
- Installation and configuration of new hardware and peripherals
- Monitoring the availability of all hardware and server resources
- Be up-to-date with recent security threats and keep systems updated accordingly
- Installation, Upgrade and configuration of software packages
- 1st and 2nd level support for our internal users as well as customers
- Documentation of IT processes and establishing of operating procedures

Location:

- the position is based in Martinsried, south of Munich, Germany.
Remote working partly possible.

We offer:

- a fun and dynamic work environment in a young, multicultural team
- stimulating and ever-challenging tasks
- competitive compensation and the possibility for career development alongside a growing team

About Us

Dynamic Biosensors is a young biotech company based in Munich, Germany, and San Diego, CA, focused on the development and marketing of our pioneering and award-winning **switchSENSE**[®] technology for molecular interaction analysis. We provide solutions to academic and industry partners in the areas of biophysical analysis and drug discovery. Beyond the science, Dynamic Biosensors is buzzing with ideas and creative people, and is fueled by an entrepreneurial spirit.

Our just-launched **helix**[®] line of instruments pushes the boundaries of what has previously been possible in biosensing. It provides a higher information content than any other biosensor by enabling the simultaneous analysis of binding kinetics, affinity, and conformational changes in proteins and nucleic acids. It outperforms state-of-the-art systems in resolving the fastest binding kinetics as well as the most stable interactions. The dissection of multiple binding events positions the technology in the front line of multi-specific antibody development.

Learn more about **switchSENSE**[®], biosensing with electrically actuated DNA nanolevers, and **helix**[®] at www.dynamic-biosensors.com.
